REPORT

OF THE

BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL,

For the Year ending December 31st, 1883.

To His Excellency S. D. McENERY, Governor of the State of Louisiana, Ex-Officio
President of the Board of Administrators of the Charity Hospital:

Your Excellency—In presenting the accompanying Annual Reports of the officers of the Charity Hospital, it is with sentiments of deep regret that I allude to the demise of our late worthy and efficient Secretary and Treasurer, the Hon. Will Steven. In consequence of this sad event, and of the resignation of Mr. Edwin Marks, as an Administrator, who was elected Secretary to fill the vacancy caused by the death of Mr. Steven, the Board of Administrators have welcomed, as a valuable accession to their number, Mr. H. W. Fairchild, appointed by your Excellency.

The suggestions made in the last Annual Report with reference to greatly needed improvements have been most liberally met and encouraged by your Excellency, to whose initiative the Hospital is indebted for the building and sewerage fund, raised by voluntary contributions of the citizens of this city and State, upon your Excellency's urgent recommendation. This fund has reached, to date, the imposing amount of \$31,911 21, and the gratitude of the Board of Administrators is particularly due to the interest displayed in the matter by A. H. May, Esq., by the gentlemen who were his associates in this connection, and by the press. Thanks to the liberality and enthusiasm of its friends, stimulated by the active participation of your Excellency in the good work, the Board of Administrators have the pleasure of

announcing that progress has been made in the matter of laying the sewerage pipe, and that the building of an extension or annex to the Hospital proper, and the erection of a suitable structure to serve the purposes of a dead-house and department for pathological researches, have also been undertaken.

The extension or annex to the Hospital is contemplated to accommodate 100 adult female patients and thirty young children of both sexes, allowing 1000 cubic feet of air to each bed, thus realizing and developing the foundation of a special department for sick children, which had never existed in the Hospital, prior to the opening of one small ward for boys, as mentioned in last year's report.

There have been numerous works of internal improvement at the Hospital, carried on to a successful termination during the past year. These will be found severally described in the report of the House Committee.

On the 1st of January, 1883, there were 668 patients remaining in the house. The admissions during the year were 8152, being 1731 more than the number received in 1882, and the discharges 7134. On December 31, 1883, there were 620 sick and convalescent persons in the Hospital. There occurred 1013 deaths in the course of 1883, and the death rate was 11 per cent., this being the smallest proportion in the last fifteen years. This is due to the large number of acute diseases treated. Owing to the zealous efforts made by the House Surgeon and his assistant, and the kindly disposition shown by the Medical Staff, the service of out-door clinics, organized last year with the view of relieving the Hospital from the presence of many sufferers, who can visit the Institution daily, for the purpose of receiving professional advice and assistance, has developed to the extent that 8769 visiting patients were attended to this year, against 6000 in 1882. These figures imply a valuable economy of beds in favor of the seriously ill, for whom the Hospital is thus enabled to provide.

It has frequently been said that the Charity Hospital gives shelter to natives and residents of adjacent States, perhaps to the detriment of suffering Louisianians. This is no new question by any means, for in a directory published in this city in 1838, there appears a table showing the proportion of natives of Louisiana and of foreign countries admitted into the Hospital from 1831 to 1837 (both years included). According to this table the proportion of the former was 1 to 32, and that of the latter 1 to 106. It is believed that, at the present time, the proportion of natives of adjacent States, who have come to New Orleans for the express purpose of being treated at the Charity Hospital, may be considered as approximating five per cent. of the total number of inmates. This is likely to remain a problem difficult of solution, as the portals of the Hospital are open at all times to suffering humanity, without regard to any other question than that of the necessity for relief.

Your Excellency's attention is respectfully called to the character and amount of work done in the Pathological Department, and to the fact that the Hospital is rapidly acquiring a valuable museum.

The Library now contains 2134 bound volumes and 288 unbound periodicals. Its importance cannot be over-estimated, and it is earnestly to be hoped that its increase in the future will be rapid, owing to the advantages which are to be obtained by having conveniently at hand valuable authorities to which access may be had constantly.

It is but meagre justice to state that the harmonious working of the various departments of the Institution, during the past year, is largely due to the merciful ministrations of the Sisters of Charity; to the cheerful and appreciated co-operation of both the House Surgeon and his assistant; to the reliable character of the work performed by the Secretary and Treasurer, whose report cannot fail of being read with the greatest

interest, and to the satisfactory performance of their duty by the corps of resident students. Mention must also be made of the valuable services rendered by the Clerk, the Chemist and the Engineer of the Hospital.

The labors of the Board of Administrators have thus been much facilitated. This and the lively interest displayed in the welfare of the Institution by your Excellency, and the citizens of this city and State, are a certain guarantee that the welfare of the Hospital is assured in the future.

I have the honor of subscribing myself your Excellency's
humble and obedient servant,

THOMAS LAYTON, M. D.,
Vice-President.

HOUSE SURGEON'S REPORT.

CHARITY HOSPITAL,
NEW ORLEANS, December 31st, 1883. }

To the President and Board of Administrators:

Gentlemen—The records of the medical service are herewith respectfully presented.

At the beginning of the year, 668 patients remained in the Hospital. During the year, 8152 were admitted, making the total of inmates treated 8820. There were 1013 deaths—a mortality of 11 per cent. This is the smallest death-rate in fifteen years. There were 2972 cases of malarial fever, more than one-third of the admissions.

We have aimed to better organize the Hospital Clinics for the benefit of the out-door poor. They are treated without expense to the Hospital, save the cost of record books and material for surgical dressings. The Eye and Ear Clinic, through the commendable efforts of the Oculists and Aurist, has become an important branch of the service, having treated, during the year, 952 cases, including 113 inmates. Herewith is presented the record of the out-door patients treated in all the Clinics, 8769.

All told, the Hospital has given relief, during the year, to a grand total of 16,921 sick.

Compared with the last Annual Report, there were 1731 more patients admitted, and 2769 more treated in the out-door service.

This increase is not due to the prevalence of any epidemic disease. The appeals to the people for contributions to the Hospital have made its benefits better known to the laboring classes;

and, with improved facilities for travel, more patients than in former years now come from the country parishes. The table giving the occupation of patients, shows the admission of 5194 laboring men. A large proportion of them came from the railroad and levee camps within the State, and from the plantations of the river coast.

The demands on the Hospital have so increased as to require more room for the care of the sick. The daily admissions average 22 patients; the daily average of inmates, 649; the number remaining December 31, 620.

There are at present 623 beds and cribs in the buildings. This number is 100 more than the cubic capacity of the wards will properly allow. Yet, in most of the wards, all the beds are nearly always occupied, and patients sleeping on the floor. This overcrowding is a complaint of long standing.

The new extension of the buildings will contain 100 beds and 30 cribs, allowing 1000 cubic feet to each bed. When the buildings are completed, the beds throughout the house should be spaced according to the laws of hospital hygiene. The female patients, now grouped in some wards without distinction of disease, should be properly classified in separate apartments, and separate wards should be established for the treatment of children.

The report of the Pathologist is herewith presented. The importance of this department, and the aid rendered in the diagnosis of disease, are fully recognized. Many microscopical and other specimens of great value are being prepared. For their permanent preservation the new dead house will provide a Museum of Pathological Anatomy.

Acknowledgments are due to the donors to the Hospital Medical Library, a list of whose names is presented. The Library now contains 2134 bound volumes and 288 unbound periodicals.

In conclusion, I beg to report generally the several departments of the medical service in well ordered condition ; the Hospital well furnished and kept absolutely clean ; the patients comfortably cared for, and treated with favorable results. The domestic service for the care of the sick, conducted by the Sisters of Charity, goes on day and night with the same unvarying faithfulness, which deserves an expression of grateful recognition.

Respectfully submitted,

A. B. MILES,
House Surgeon.

MR. JOHN JOHNSON.
DR. A. B. MILES.

REPORT OF THE PATHOLOGIST.

CHARITY HOSPITAL,
NEW ORLEANS, January 1st, 1884.

To the President and Board of Administrators :

Gentlemen—I respectfully present to you the following summary of the labors performed in the Pathological Department of the Charity Hospital during the year 1883 :

1. Autopsies made.....	292
2. Specimens of Urine examined	1082
3. Specimens of Sputa, Vomit, Blood, and other miscellaneous fluids prepared and examined	80
4. Tumors examined	22
5. Microscopical Sections made of 109 different pathological specimens	2325
6. Microscopical Sections permanently mounted.....	135

Besides the works enumerated above, other labors, too complicated to be mentioned in a specified form in this report, without entering into lengthy details, have been performed in this department. They mainly consist in the study and investigation of special pathological subjects, the results of which are, for the benefit of the medical profession at large, published from time to time in the leading medical journals.

In closing this report, allow me to mention that, though through the liberality of the Honorable Board of Administrators of the Hospital, the pathological department has been put, during the past year, in better working order than it was before, some things are still wanting to make it complete. I refer particularly to a number of standing works and journals on the subjects of Pathology, which are most essential as works of reference for keeping informed on the progress made of late years in this department of medical science.

Hoping that this report will be favorably received, I am,

Very respectfully yours,

H. D. SCHMIDT.

TREASURER'S REPORT.

CHARITY HOSPITAL, }
TREASURER'S OFFICE, }
New Orleans, January 1st, 1884. }

To the President and Board of Administrators:

Gentlemen—The close of the fiscal year, ending 31st ultimo, renders it necessary to submit for your consideration the summary of its general and financial condition.

The Board, as constituted by his Excellency the Governor, viz: Dr. Thomas Layton, Vice-President; Messrs. M. D. Lagan, Edwin Marks, P. Buchanan, Richard Sinnott, Charles Lafitte, J. T. Gibbons and Dr. C. J. Bickham, were in administration of affairs, as named, until the 15th day of April, when the decease of Hon. Will Steven, Secretary and Treasurer, produced a change by the selection of Mr. Edwin Marks to that position after his resignation as a member of the Board, and the after appointment, by his Excellency, of Mr. H. W. Fairchild to the vacancy created by Mr. Marks' retirement as an Administrator.

The death of Mr. Steven was a serious loss to the Institution. His fine business experience, clear judgment and high probity of character, rendered him eminently fitted for the responsibilities of the position. Particularly were his services of great value in connection with the scheme of the "Building and Sewerage Fund." He was one of the main inceptors, and his clear and comprehensive narration of the additional wants of the Hospital in his letter to the Governor, promptly induced his Excellency to render his important aid to the project, and which so much conduced to its after success. He methodized the plans by which systematic committees worked and culminated in success. He was a conscientious, faithful officer. His death was duly noticed by the Board in appropriate and well-deserved resolutions.

During the year (August 6th) the Board voted "to raze to the ground" the building opposite the Hospital, known as the Garfield School, or formerly, as the School of Medicine, a property purchased by the previous Board of Administrators. This

action was taken with a view toward the utilization of the material in connection with the erection of the proposed extension elsewhere noticed. It was done after mature deliberation, and following clear and emphatic reports from two leading architects that the structure was totally unfitted for Hospital purposes as it stood, and could never be properly adapted, except at very heavy expense, and then dividing the service at additional and unnecessary cost.

The work of razing has been carefully accomplished, and the material put away for timely use, and to become an important factor in the reduction of cost of the new building.

With a slight change in the figures (\$209 71 additional) the cost on the balance sheet of last year is unaltered. During the year the result of the investment can be exhibited.

During the year the returns from auctioneers has been gratifying, showing collections from this source of \$15,994 83, against \$396 70, of the previous year. This result has been due to the decision in favor of the Hospital in the case of the State vs. Girardey, immediately following which large payments were made. Latterly the matter of collection has been again placed in issue by the refusal of the same defendant to pay further, and the decision is now awaited in the Civil District Court, doubtless to be appealed to the Supreme Court by either party, as a finality. Counsel has been associated with the Board's Attorney in the case.

The Hospital is to be congratulated on the solid benefit that has been derived by the enhancement of State warrants, enabling the Board to save the ruinous sacrifices of previous years. Last year's report shows a discount and loss to the Hospital of \$28,857 50, against a discount of \$7742 50 this year, exhibiting a gain of \$20,845.

I have the pleasure of reporting the payment by the estate of Robert Y. Charnbury, of the legacy of \$1000, uncollected at date of last report. In conclusion, I present the annual statement of receipts and disbursements for 1883, the balance sheet of the books, December 31, 1883, and the table of property, warrants, rents notes, etc., owned by the Hospital at this date.

Respectfully submitted,

EDWIN MARKS,

Treasurer.

EXTRACT FROM MINUTES.

ANNUAL MEETING, JANUARY 7, 1884.

[Extract from the Minutes of the Board.]

* * * * *

"The Chairman of the Finance Committee, P. Buchanan, Esq., recommended to the Board to transfer the sum of twenty-five thousand dollars (\$25,000) of the General Fund, consisting of twenty thousand dollars (\$20,000) in State warrants of 1883, and five thousand dollars (\$5000) in cash, to the 'Building and Sewerage Fund,' for the improvements now in progress. He offered the following preamble and resolution, which, after second from Mr. Gibbons, was adopted:

"WHEREAS, The facts exist, that by a fortunate combination of circumstances, occurring during the past year, viz: the saving over the previous year of \$20,845 in discount on State warrants, owing to their enhancement to par value and their redemption by the State: and the large collections, \$15,994 33, on account of auction sales: thus creating a surplus after all current debts of the Hospital have been paid; and, whereas, the improvements now in progress, consisting of the Sewer System, the extension to the Hospital, and New Dead House, require the sum of \$25,000 for their completion, therefore,

"Be it Resolved, That the sum of \$25,000, made up of \$20,000 in State warrants of 1883, and \$5000 in cash, be transferred from the 'General Fund' to the 'Building and Sewerage Fund' for improvements."

CHARITY HOSPITAL, }
TREASURER'S OFFICE, }
New Orleans, January 11th, 1884. }

The undersigned, having been duly appointed a committee to examine the accounts of the Treasurer, for the year ending December 31st, 1883, as provided for by Article 392, Revised Statutes, do hereby report that they have made the examination as contemplated, and find the books, accounts and statements are true, just and correct.

JOHN T. GIBBONS,
P. BUCHANAN,
CHAS. LAFITTE,

Committee.

REPORT OF FINANCE COMMITTEE.

NEW ORLEANS, January 1, 1884.

To the President and Board of Administrators:

Gentlemen—The undersigned, your Finance Committee, beg leave to report that they have, from time to time, examined the books and accounts of the Treasurer, and find the same correct, and kept by him in accordance with previous system in vogue with his predecessors. In addition, he has, at the close of each month, taken a trial balance, which is duly transcribed in a book special for the purpose. His report is an accurate financial exhibit of the fiscal condition of the Hospital for the year past, and at its close. Under the Statutes governing the Board, the final examination of his reports, books, etc., is reserved to a Committee, to be appointed at the Annual Meeting. At that meeting we shall recommend the transfer of funds from the "General Fund" to the "Building and Sewerage Fund," for reasons then to be assigned.

Respectfully submitted,

P. BUCHANAN,

Chairman,

JOHN T. GIBBONS,

R. SINNOTT,

Committee.

REPORT OF HOUSE COMMITTEE.

NEW ORLEANS, December 31, 1883.

To the President and Board of Administrators of the Charity Hospital :

The undersigned, members of the House Committee, respectfully present the following statement of duties performed by them, under the authority of the Board, for the year 1883 :

One of the most necessary is the erection of a first-class elevator, operated by water pressure, at a cost of nearly two thousand dollars. Two new steam-pumps, one for supplying water to elevator, the other to provide suitable supply of water to boilers have been erected. One new washing machine, capacity 4000 pieces in twenty-four hours, and one steam automatic ironing machine, were introduced. The former was constructed on the spot, the latter purchased from Hamilton E. Smith of New York, who is the patentee. The cost price is \$600. In consequence of its being purchased for charitable purposes, it was sold for \$500, and delivered free. Six new steam radiators, of large capacity, together with handsome screens for them, and also the screens for those erected last year, have been provided. New flooring has been laid throughout the main hall on second floor, whilst the old flooring has been all utilized for same purpose on the fourth or garret story. It may not be out of place to mention the fact that until this time no proper and safe communication existed, whereby persons could escape from the different wards and stories in the event of fire, except by the staircase inside. Since our last report new and convenient stairs are placed on the outside of the rear of the main building, and easy of access.

In addition to the foregoing, we have contracted for a new and much larger steam boiler than the present main boiler, which has seen over twenty-six years of constant service ; and

for a very large "Blake Pump," which will be used in ejecting the fecal matter through the sewerage pipe to the Mississippi River.

On a thorough inspection of the general cooking apparatus, we find it will be necessary to enter into very expensive repairs to same, and, upon inquiry, we were informed that a new and more perfect system of cooking apparatus can be had for the same money; consequently, we have contracted for a new duplex range, of the most approved and economical arrangements, which will be erected in the early spring.

Very respectfully,

CHARLES LAFITTE,

M. D. LAGAN,

House Committee.

PROPERTY OF CHARITY HOSPITAL,

DECEMBER 31st, 1883.

REAL ESTATE.

*Hospital grounds and improvements.

Mrs. Cora Livingston Barton, who died some years ago, left to the Hospital the sum of six thousand dollars, to be paid out of a fund to be derived from the sale of the property No. 751 Broadway, New York, upon the death of Julia Barton Hunt and the Hon. Carleton Hunt, who, in the meantime, have the usufruct of said property.

ATTORNEY'S REPORT.

NEW ORLEANS, January 1, 1884.

To the Honorable the Board of Administrators of the Charity Hospital :

Gentlemen—I have the honor to report that since your last annual meeting I have succeeded in collecting from the different auctioneers in the city of New Orleans, the sum of \$9434 95, depending upon the judgment in the suit of the State vs. C. E. Girardey ; that since this amount has been collected, Mr. Girardey, the defendant in that suit, has refused to settle for the amount due by him for the year just passed, which, in accordance with the decision of the Supreme Court and his sworn return of sales, amount to \$2506 78. for which suit has been brought ; that this suit has been tried in the Civil District Court, Division E, and has been taken under advisement by the Judge, with a prospect of an early and favorable settlement of the matter.

In view of the fact that licenses have been issued to proprietors of theatres in this city by the municipal authorities, without exacting the receipt of the Treasurer of the Charity Hospital for the sum of \$100, as required by Section 397, of the Revised Statutes of the State of Louisiana, I have brought suit against David Bidwell, proprietor of the St. Charles Theatre, and lessee of the Academy of Music and Grand Opera House, in the Civil District Court, for the sum of \$300 ; that said suit is now at issue and will soon be tried.

Respectfully submitted,

J. A. GILMORE,

Attorney.

REPORT

— OF —

BUILDING AND SEWERAGE FUND.

NEW ORLEANS, January, 1884.

To the President and Board of Administrators, Charity Hospital:

Gentlemen—For information of the General Assembly, I herewith present Report of the Building and Sewerage Fund.

On February 3d, of the past year, the Board of Administrators, through their late Secretary, Will Steven, now deceased, addressed a communication to his Excellency Governor S. D. McEnery, setting forth the crowded condition of the Hospital, and the great importance of increasing its room, particularly for the accommodation and care of women and children, and also calling his attention to the necessity of taking early action relative to the construction of a sewerage system to the river, with proper equipments. This letter, lengthily and graphically treated of these great wants, and forthwith elicited a reply from his Excellency, in which, after reviewing the necessities of the Extension, Dead House and Sewerage system, as indispensable desiderata from the growing demands of the Institution, he recommended an appeal to the citizens of New Orleans and the parishes, for voluntary donations for the good work, the remote meeting of the General Assembly and constitutional limitation of appropriations rendering it doubtful for the obtainment of State aid. Upon the receipt of the Governor's letter, the Board of Administrators, at their meeting of February 16th, appointed a committee of five to prepare a plan of action, whereby the suggestions of his Excellency could be carried out. In due course, and after proper publication, the citizens of New Orleans were invited to assemble in the

Mayor's parlor, with a view towards devising ways and means to carry out the project, and a meeting was held, at which several of the leading merchants were present, such as Messrs. A. H. May, his Honor Mayor Behan, Albert Baldwin, W. B. Schmidt, E. J. Hart, Adam Thomson, I. L. Lyons, C. H. Hyams, Isidore Newman, Edward Booth and others, as well as the Board of Administrators. An organization was at once entered into, with A. H. May, Esq., as Chairman, and proceedings at once instituted by the appointment of committees on the different callings, trades and professions, for the purpose of soliciting contributions. The work progressed under the auspices entered into, and returns were regularly made to the Secretary and Treasurer of the Hospital, and which were by him regularly credited to the donors in publications in the leading city dailies. Too much praise cannot be awarded to Mr. May and his coadjutors in the noble work. Committees seemed to vie with each other in the cause of Louisiana's greatest charity, and the spirit of emulation evoked in the city impelled several of the parishes to work abreast with the Metropolis; and St. John, St. Landry, Terrebonne, St. James and other parishes poured forth their help, commensurate with the ability of their people.

The works contemplated by the Board with aid of the Fund are in full progress; the sewer pipe has been laid to the river, and the tank and auxiliary engine and pump are in process of construction, and within a period of a few weeks the Hospital will have established the great hygienic improvement. The main contracts for the extension and dead house have been awarded to responsible mechanics, and the work of demolition of the old dead house and carpenter shop is going on as preliminary in preparation for the site.

The estimate cost of the improvements are, in round figures, as follows:

Sewer pipe, etc., complete.....	\$20,000 00
Extension and dead house	25,000 00
Furnishing extension	5,000 00

\$50,000 00

To meet this expenditure the Board have in their control :

Building and Sewerage Fund	\$32,000 00
General fund, applied by Board for improvements	25,000 00

\$57,000 00

The State and its citizens are to be congratulated at the result thus presented—the Hospital free of debt and the great improvements to be regarded as accomplished facts.

Respectfully submitted,

EDWIN MARKS,

Secretary and Treasurer of Building and Sewerage Fund.
